Financial Results

The net income applicable to common stockholders was \$373,000 or \$0.06 per fully diluted share and \$746,000 or \$0.13 per fully diluted share for the three and six months ended June 30, 2015, compared to a net income of \$391,000 or \$0.07 per fully diluted share and \$723,000 or \$0.12 per fully diluted share for the three and six months ended June 30, 2014.

Pre-Corporate EBITDA was \$1,144,000 and \$2,389,000 for the three and six months ended June 30, 2015, compared to \$1,090,000 and \$2,369,000 for the three and six months ended June 30, 2014.

The following table reconciles income before provision for income taxes under GAAP (as reported in the Company's SEC filings) to EBITDA and Pre-Corporate EBITDA for the three and six months ended June 30, 2015 and 2014.

(in thousands)	Three mon June		Six months ended June 30,		
	2015	2014	2015	2014	
Operating Income	\$ 757	\$ 606	\$ 1,595	\$ 1,346	
Add: Amortization and depreciation	125	110	252	370	
EBITDA	882	716	1,847	1,716	
Add: Corporate overhead	262	374	542	653	
Pre-Corporate EBITDA	\$ 1,144	\$ 1,090	\$ 2,389	\$ 2,369	

Changes in operating income and Pre-Corporate EBITDA for the three and six months ended June 30, 2015 when compared to the three and six months ended June 30, 2014 were the result of the following:

- Increased revenues in the core modeling business driven by an expanded developed talent pool and our customers' increased interest in booking the Company's talent, along with the addition of the London operations.
- Salaries and service costs as a percentage of revenue were 17.3% for the three and 17.5% for the six months ended June 30, 2015, compared to 16.6% for the three and 16.8% for the six months ended June 30, 2014. These costs increased in order to support the Company's continued growth and to facilitate the upgrade of its accounting system and enhanced reporting system.
- Office and general expenses as a percentage of revenue decreased to 5.2% for the three and 5.4% for the six months ended June 30, 2015, when compared to 5.5% for the three and 5.8% for the six months ended June 30, 2014. While the expense relative to revenue decreased, the absolute dollar expense increased by \$42,000 and \$121,000, primarily associated with expenses to operate the London facility, respectively.
- Operating margins improved slightly at 3.5% for the three and 3.7% for the six months ended June 30, 2015 as compared to 3.1% and 3.6% from the corresponding period of the prior year. The improvements as a proportion to revenue in office and general expenses and corporate overhead were partially offset by increases in salary expense relative to revenues in both the three and six months ended June 30, 2015 as compared to the three and six months ended June 30, 2014.

Non GAAP financial measures

The Company calculates Earnings before Interest, Income Taxes, Depreciation and Amortization ("EBITDA") as operating income before depreciation, and amortization expense. The Company calculates Pre-Corporate EBITDA as EBITDA before corporate overhead at the holding company level.

Although EBITDA and Pre-Corporate EBITDA represent non-GAAP financial measures, the Company considers these non-

- are key operating metrics of the Company's business
- are used by management in its planning and budgeting processes and to monitor and evaluate its financial and operating results
- can be useful to investors since they provide an analysis of financial and operating results using the same measures that the Company uses in evaluating itself.
- provide stockholders and potential investors with a means to evaluate the Company's financial and operating results against other companies within the Company's industry.

However, the Company's calculation of these non-GAAP measures may not be consistent with calculations of these measures by other companies in the Company's industry.

Non-GAAP financial measure are defined as numerical measures of financial performance that excludes or includes amounts so as to be different than the most directly comparable measure calculated and presented in accordance with United States generally accepted accounting principles ("GAAP") in a company's statements of operations, balance sheets or statements of cash flows. Pursuant to the requirements of Regulation G, the Company provides a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures. Non-GAAP measures are not measurements of financial performance under GAAP and should not be considered as alternatives to operating income as an indicator of the Company's operating performance or cash flows from operating activities, as a measure of liquidity or any other measure of performance derived in accordance with GAAP.
